

KAVITHA ARUNKUMAR

Full Stack Developer

33/1A, Jothi Nagar, Thiruvottiyur, Chennai-19 | 9080042787 | kavithaarunkumar33011@gmail.com

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on project experience building end-to-end web applications using React.js, Spring Boot, and SQL. Transitioned into software development from a design background, bringing strong UI/UX sensibility together with backend engineering skills including RESTful API development, database design, and application deployment. Passionate about solving problems across the entire stack, from responsive front-end interfaces to scalable back-end services.

TECHNICAL SKILLS

- Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design
- Backend: Java, Spring Boot, Spring MVC, Spring Data JPA, Spring Security, RESTful APIs
- Database: MySQL, Oracle SQL, PL/SQL, Hibernate, Database Design & Normalization
- Tools & Deployment: Git, GitHub, Maven, Postman, Render, GitHub Pages, VS Code, CI/CD
- Concepts: API Integration, MVC Architecture, CRUD Operations, CORS, Caching, Unit Testing (JUnit)

PROJECTS

Padma Jewellery – Full-Stack Ecommerce Application | June 2026 – Present

Tech Stack: Java, Spring Boot, Spring MVC, Spring Security, React, Oracle DB, Razorpay API, HTML, CSS, Bootstrap

Live site: <http://www.padmajewellery.com>

- Developed a full-stack ecommerce application using Java 17 and Spring Boot for the backend, with Oracle Database for product, user, and order management.
- Built REST APIs with Spring Boot for the product catalog, shopping cart, user authentication, and order processing.
- Integrated the Razorpay Payment Gateway, implementing order creation, payment verification, and webhook handling; tested success and failure flows in the Razorpay sandbox.
- Designed a responsive frontend with Bootstrap and React for product listing, cart, and checkout pages.
- Created normalized database tables in Oracle DB for products, users, orders, and payments; wrote SQL queries and stored procedures for reporting.
- Implemented security using Spring Security for login, role-based access control, and session management.
- Deployed the application on Render with proper environment configuration.
- Reduced checkout time by implementing asynchronous order processing; made the site fully mobile-responsive.

StockVision – Real-Time Stock Market Dashboard | 2026

Tech Stack: React.js, JavaScript (ES6+), HTML5, CSS3, Chart.js, Spring Boot

Live site: <https://kavithaarunkumar33011-ai.github.io/stockvision/>

- Developed a responsive single-page application to track real-time stock prices with interactive Chart.js visualizations.
- Built reusable React functional components with Hooks (useState, useEffect) for state management and lifecycle handling.
- Developed RESTful APIs using Spring Boot to fetch and cache Alpha Vantage stock market data.
- Integrated the Alpha Vantage REST API for live market data with error handling for API failures; implemented React Router for navigation and conditional rendering.
- Designed a mobile-responsive UI with a dark mode toggle using CSS3 and the Context API for theme management.
- Optimized performance by managing component re-renders; deployed the production build to GitHub Pages with CI/CD.
- Key features: real-time data updates, time filters (1D/1W/1M/1Y), global market clock, financial news integration, popular stocks shortcuts.

EXPERIENCE

Front-end Developer | Nithwin Engineering | Chennai

February 2019 – July 2025

Developed and maintained responsive company website using HTML5, CSS3, JavaScript in Visual Studio Code.

Designed and coded digital brochures, product catalogues, and email templates with print-ready CSS. Generated PDFs and distributed to 500+ B2B clients via email.

Collaborated with Marketing and Sales teams to update product specifications, images, and launch new product landing pages.

Ensured mobile-first responsive design and optimized page load speed for better user experience for dealers and clients.

Web Designer | Qnex Technologies | Chennai

December 2013 – January 2015

- Produced graphics and layouts for websites and digital applications using HTML and CSS.
- Created engaging visual content for digital platforms and marketing materials.
- Designed layouts for print and web projects to enhance visual communication.
- Designed brochures, flyers, and posters for marketing campaigns.
- Collaborated with cross-functional teams to develop cohesive brand strategies and guidelines.

Career Transition & Upskilling | Besant Technologies

2025 – 2026

- Transitioned from Graphic Design to Full Stack Development through self-learning and structured coursework at Besant Technologies.
- Completed hands-on projects using Java, Spring Boot, React.js, and SQL.
- Built the My Portfolio, StockVision, WeatherApp using React and Ecommerce Website a Java full-stack application, demonstrating end-to-end development skills.

EDUCATION

Bachelor of Computer Science Engineering

Arignar Anna Institute of Science and Technology

Graduated: June 2012 | CGPA: 7.0 / 10

CERTIFICATIONS & LEARNING

- Java Full Stack Developer (Java, SQL, Web designing, React.js, Spring Boot) – Certification, Besant Technologies, Anna Nagar
- Typewriting – Low Grade

KEY COMPETENCIES

- Problem Solving: Debugged complex deployment and API integration issues in the StockVision project.
- Collaboration: Version control with Git/GitHub and clear code documentation.
- Quick Learner: Self-taught React deployment, Hooks, and performance optimization techniques.
